REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The Examiner finds that the amendments to independent claims 1, 10, and 19 filed on 24 March 2005 concerning a process for a simplified access control language that controls access to directory entries in a computer environment place in condition for allowance independent claims 1, 10, and 19. The combinations of prior art from Weschler et al. (U.S. Patent No. 6,470,332), Hann et al. (U.S. Patent No. 4,799,153), and Albrecht et al. (U.S. Patent No. (5,950,011) neither render obvious nor anticipates the combination of recited elements in light of claims 1, 10, and 19. In particular, the combination of Weschler, Hann, and Albrecht does not render obvious the phrase "said user applying said read access control list command by listing a subset from said system administrator defined LDAP user attributes for authorizing read access to said subset of user attributes to one or more other users".

2. The Examiner finds that the amendments to independent claims 5, 14, and 23 filed on 24 March 2005 concerning a process for a simplified access control language that controls access to directory entries in a computer environment place in condition for allowance independent claims 5, 14, and 23. The combinations of prior art from Weschler et al. (U.S. Patent No. 6,470,332), Hann et al. (U.S. Patent No. 4,799,153), and Albrecht et al. (U.S. Patent No. (5,950,011) neither render obvious nor anticipates the combination of recited elements in light of claims 5, 14, and 23. In particular, the combination of Weschler, Hann, and Albrecht does not render obvious the phrases "providing a plurality of user defined access control list command attribute

read lists containing user identifications of said one or more other users that are allowed to read said user defined subset from said LDAP user attributes that said administrator has selected for user defined read access” and “providing a plurality of user defined access control list command attribute write lists containing user identifications of said one or more other users that are allowed to write said user defined subset from said LDAP user attributes that said administrator has created for user defined write access”.

3. The Examiner finds that the amendments to independent claims 6, 15, and 24 filed on 24 March 2005 concerning a process for a simplified access control language that controls access to directory entries in a computer environment place in condition for allowance independent claims 6, 15, and 24. The combinations of prior art from Weschler et al. (U.S. Patent No. 6,470,332), Hann et al. (U.S. Patent No. 4,799,153), and Albrecht et al. (U.S. Patent No. (5,950,011) neither render obvious nor anticipates the combination of recited elements in light of claims 6, 15, and 24. In particular, the combination of Weschler, Hann, and Albrecht does not render obvious the phrase “said user applying said write access control list command by listing a subset from said system administrator defined LDAP user attributes for authorizing write access to said subset of user attributes to one or more other users”.

CONCLUSION

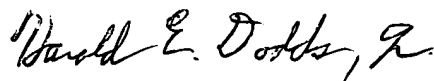

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
